

CROPLANDS

WEEDit – Boom Parking, Quick Start Guide (v3), to suit the 4 + 5 switchbox.

It's vital that the correct parking procedures are followed.

Failure to follow these guidelines may result in damage to the sprayer.

Perform all folding operations on flat ground.

LH and RH Fence-line switching is via the same switchbox. Down is OFF.

TO OPEN THE WEEDit BOOM, ready to spray >>>

1. Hold the **LATCH ARMS** switch **DOWN** to set the latches to the Lock position. Check the locking rams are retracted.

2. Fully extended both stay arms. Hold the **FOLD ARM** switch to the **DOWN** position until both sides are fully extended.

3. Set the **BOOM STEER WHEELS** switch to **PART FOLD**, this will only allow the boom wheels to rotate 1/2 of their travel.

4. **Drive forwards slowly below 5 KM/H.** While moving forward, hold both the **LH WHEEL** & **RH WHEEL** switches **DOWN**, this will allow the booms to move approximately out half way

- It will take approximately take 10 ~ 30 metres of travel to accomplish this, depending on the soil conditions.
- Set the **BOOM WHEELS** switch back to the **LOCK** position.

Rotate the main wheels back to the original position, so they are in-line with the boom. Hold both the **LH WHEEL** & **RH WHEEL** switches to the **UP** position until done.

5. **Reverse slowly** until the booms arms have opened all the way and the fold arms have **latched into the locks**.

- If one side latches before the other side use the wheel switch to rotate the wheel to the field position to prevent the wheels from bulldozing.
- It may take around 10 metres of travel to accomplish this, depending on the soil conditions.
- Do not continue to reverse with wheels in this position.
- **Double check** that both stay arms are docked & locked.

6. Rotate both main wheels “outwards” 90 degrees, to now point forwards in the direction of spray travel. Hold both the **LH WHEEL** & **RH WHEEL** switches to the **DOWN** position, and at the same time slowly move forwards until done (a few seconds).

7. **Spray mode:** Set the **BOOM WHEELS** switch to **SPRAY** position. This will allow the boom wheels to float when turning. Go spraying.

TO FOLD THE WEEDit BOOM >>> All folding operations should be on flat ground

1. **Lock the wheels** (facing direction of travel). Set the **BOOM WHEEL** switch to **LOCK**.

2. **Unlock the arms.** Move the **LATCH ARMS** switch **UP** to UNLOCK.

3. **Drive forwards slowly below 5 KM/H.** While moving forward, hold both the **LH WHEEL** & **RH WHEEL** switches **UP**, this will move the wheels into the transport position (in line with the boom). Travel forwards slowly until both booms are trailed behind the sprayer.

4. **Fold in both stay arms.** Hold the **FOLD ARM** switch to the **IN** position until both sides are fully retracted. Only fold the arms in when the booms are fully avoid damage to mudguards.

5. **Set up the machine for safe transport** (also see Transport, unloading & setup guide). Remain in “Lock”.
